Instructions for CF Card Reprogramming

First step is to download and unzip the contents of "CFC-IMAGE-H4180-170907.ZIP"
 from E-Mail, or the "Downloads" page on the OcuScience website .

Click to *download* "CFC-IMAGE-H4180-170907.ZIP" 2. *Plug in* the CF card-reader to the same computer and *insert* the CF card into the card-reader. At this point, any tests or results from the CF card should be saved to a computer so they are not deleted.

3. After any files that are wanting saved are saved, the card needs to be reformatted. This is done by going into **drive tools -> format**. This is what should be in the format settings.

Once the settings are correct, press "Start". This will erase all files on the card. Once the format is complete, you can press "Close".

4. Now that the card is reformatted, the contents ofthe .ZIP file from earlier can simply be copy and pastedonto the CF card. You will have to go into the .ZIP fileand "select all", rather than simply copying the folder.The contents on the drive should look similar to this.

S DLL404.dll	12/31/2019 7:29 AM	Application extension	13	KB
📌 E4380R	9/19/2012 11:13 AM	Windows Installer Pa	6,281	KB
HMERG	9/7/2017 8:40 PM	Application	346	KB
🛃 HMsERGusersManual	2/1/2017 4:06 PM	Adobe Acrobat Docu	1,341	KB

5. With the contents pasted correctly, there is one last step before the CF card is ready to use. Start by going into the folder labeled **HCOMMON** -> **HMERG.INI** -> and then *change* the HMsERG number to the CF card serial number.

Thank You!
